PMP	Project Management Platform

1 INTRODUCTION

The present document describes the map of the DIAMONDS4IF website, the information provided (linked to dissemination and communication activities – WP9), as well as the internal section of the website developed for management purposes.

This document includes some images (screenshots) to better illustrate the different areas/sections available for visitors and/or consortium.

The DIAMONDS4IF website, available at **www.diamonds4if.eu**, includes:

- ✓ General description about the project, its impact, objectives and consortium

- ✓ Public information on DIAMONDS4IF, such as project's brochure and public deliverables

- ✓ News and Events from the consortium partners

- ✓ Subscription to the project newsletter

- ✓ Access to internal area (only for partners) to facilitate the management of project's documentation

The public website has been developed by INNEN after several iterations with all the partners to agree on the layout and graphic, while the internal area for management purposes has been customized within the platform "Project Management Platform" providing an easy to use and effective knowledge sharing platform.

2   PUBLIC WEBSITE

2.1   HOMEPAGE

The DIAMONDS4IF public website, available at the URL **www.diamonds4if.eu**, has been developed by INNEN after several iterations with all the partners to agree on the layout and graphic, and it is available in English.

The aim of the website is to provide main information about the project and the progress of the activities, to attract visitors, keep interested parties and user group members updated on the project achievements, and to inform about available tools and support measures.

The homepage provides a short description of the project and the direct links to the different available pages (About – Mediaroom – News – Events – Newsletter - Contact).

To show synergies with our sister projects we will present their logos and sectors underneath the description of our consortium, when all information is available.

The images below show the screenshot of the homepage:

2.2 PARTNERS PRIVATE AREA

Figure 2. Login area screenshot

As visualized in the above image, the homepage provides access to the LOGIN AREA (Partner Private Area). Depending on the user ID and password indicated, the users will enter in the project management platform associated to the own password.

2.3 PUBLIC WEBSITE SECTIONS

The public website is composed by the following pages:

- **About:** provide a general description of the **project** with:

    - **Impact:** This section outlines the expected or achieved effects, changes, or benefits resulting from the project's implementation.

    - **Objectives:** This section delineates the specific, measurable goals or targets that the project aims to achieve within a defined timeframe.

    - **Consortium:** the list of the project partners with a brief description of their major activities, the link to their corporate website and the official logo.

- **Mediaroom:** this webpage contains publicly available materials, deliverables, and a dissemination kit available for download.

- **News:** page providing brief news from the project.

- **Events:** page dedicated to publish events organized by the consortium and/or related to the project objectives.

- **Contact:** page containing a standard web-based form to submit feedback or questions to the DIAMONDS4IF consortium.

- **Newsletter:** page providing a registration form that will grants to the registered users to receive a newsletter from the DIAMONDS4IF community.

Below the screenshots for some of the mentioned pages.

3 PARTNERS PRIVATE AREA – PROJECT MANAGEMENT PLATFORM

As visualized in section 3.1, the homepage provides access to the **Project Management Platform**. The idea was to provide access to the LOGIN area directly from the public website to facilitate the partners to login.

This section contains useful functions for project management:

- **Documents**: Document Management System that allows the project partners to share documents, deliverables, images, etc.

- **Partners:** list of contacts of the DIAMONDS4IF consortium

- **Calendar/Events**: function to share or schedule events on a calendar grid. All partners are informed by email each time a new event is created.

- **Discussion**: function to create private discussion and forum for the DIAMONDS4IF consortium.

- **Doodles**: function to create and share polls inside the DIAMONDS4IF partners group.

- **Mailing list**: create, manage and update the mailing list for the DIAMONDS4IF consortium.

4 RESPONSIBILITIES

The public and internal areas of the DIAMONDS4IF website are online as of 29/02/2024 (M2) and as planned in the DoA, after agreement by all partners.

The public website is updated by INNEN, with the collaboration of partners about news and events. The information to be published is managed by MEYER BURGER, after agreement by all partners.

The private area is updated by the partners and managed by the coordinator PNO in collaboration with INNEN.
